

Negative/Positive Pressure Hydrostatic Coating

Kitchens, Foundations & Villas, Pools & Tanks

Basements, Elevator Shafts, Walls & Bathrooms

ULTRA GRIP™

PRODUCT LINE

ULTRA GRIP™ is a bright extra white, light textured finish, high-performance commercial grade 10 year, concrete & masonry waterproofing coating. Waterproofing resin modified with flexible encapsulated polymers which penetrate into the masonry for the ultimate in waterproofing protection. This new technology has excellent penetration on porous surfaces and will resist up to 10 psi of negative or positive hydrostatic pressure, which is the equivalent of a 22 foot high wall of water. It will also reduce penetration by radon gas. **ULTRA GRIP™** is formulated with an environmentally friendly biocide to resist mildew growth. Conforms to ASTM D-7088 Resistance to Hydrostatic Pressure and ASTM D-6904 Resistance to Wind Driven Rain.

ULTRA GRIP™ CLEAR is a clear high-gloss, high-performance commercial grade, concrete & masonry waterproofing coating for floors and walls and decorative surfaces. Waterproofing resin modified with flexible encapsulated polymers which penetrate into the masonry for the ultimate in waterproofing protection. This new technology has excellent penetration on porous surfaces and will resist up to 4 psi of negative or positive hydrostatic pressure, which is the equivalent of an 8.8 foot high wall of water. It will also reduce penetration by radon gas. **ULTRA GRIP™ CLEAR** is formulated with an environmentally friendly biocide to resist mildew growth. Conforms to ASTM D-7088 Resistance to Hydrostatic Pressure and ASTM D-6904 Resistance to Wind Driven Rain.

ULTRA GRIP™ PLUS is a bright extra white, smooth finish, high-performance industrial grade 15 year, concrete & masonry waterproofing coating. Waterproofing resin modified with flexible encapsulated polymers which penetrate into the masonry for the ultimate in waterproofing protection. This new technology has excellent penetration on porous surfaces and will resist up to 15 psi of negative or positive hydrostatic pressure, which is the equivalent of a 33 foot high wall of water. It will also reduce penetration by radon gas. **ULTRA GRIP™ PLUS** is formulated with an environmentally friendly biocide to resist mildew growth. Conforms to ASTM D-7088 Resistance to Hydrostatic Pressure and ASTM D-6904 Resistance to Wind Driven Rain.

ULTRA GRIP™ SALTSHIELD is a Concrete Protector that provides weatherproofing and protection against deterioration caused by deicing salt, household cleaners, gasoline, oil and efflorescence (powdery, white, salt-like deposits visible on masonry). The unique **SALTSHIELD** technology penetrates into concrete and masonry providing excellent resistance to efflorescence staining often visible on brick, block and poured concrete surfaces. **ULTRA GRIP™ SALTSHIELD** seals bare masonry surfaces against dusting, staining, surface cracking and pock marking.

Protects Against Road Salt, Weathering, Gasoline and Oil • Prevents Excessive Dusting, Surface Cracking and Pockmarking
• Solidifies Masonry Surfaces for Top Coat • Minimizes Reoccurring Efflorescence • Primes Prior to Paint

Note: ULTRA GRIP™ SALTSHIELD is not for use on asphalt surfaces, silicone treated surfaces, or on any masonry surface subjected to hydrostatic pressure. Surfaces subjected to hydrostatic pressure should be treated with other ULTRA GRIP™ products that resist hydrostatic pressure.

ULTRA GRIP™ DRY MIX powdered masonry coating is formulated to fill and seal porous masonry walls against water, even under pressure, by becoming an actual part of the original surface. An aggregate type material, **ULTRA GRIP™ DRY MIX** is ideal as a base coat, as well as a finish coat. This economical waterproofer can be used inside or outside, above or below grade. This powdered form of **ULTRA GRIP™** Masonry Coating is the perfect formula for surfaces with extreme efflorescence. It mixes easily with water to make an economical white masonry waterproofing coating.

Resists 10 PSI Hydrostatic Pressure • May be Applied to Slightly Damp Surfaces • Reduces Radon Gas Penetration •
For use on Cisterns and Potable Water Tanks and Systems
